## Guam

URS Table Number	General Notes
2A, 3, 5A & 6	For multi-year edits: Manual Intervention Rate (MIR) caused by newly acquired data clerks added duplications/or higher of data collection from different programs. Plans are in place to extract data from our Electronic Health Records "AWARDS" application system which will drastically reduce the MIR and improve accurate accountability of all data collection for the upcoming URS report FY2018.
4	We removed any clients in an institutional setting at discharge/end of the fiscal year. (DOC, DYA, ERH, SNU). The increases in total number of consumers employed/unemployed and not in labor force are due to better reporting process.
7A	Data not available
11	The responses in Child/Adolescent Consumer Survey numbers reflect the responses from our satisfaction survey that is self-administered and families are encouraged to fill one out during their visit to our office. It is a short single page eight question survey- asking to rate their level satisfaction and quality of care they received at our office during their visit.
12	Percentage of adults served by the SMHA who also have a diagnosis of substance abuse problem and Percentage of adults meeting Federal definition of SMI who also have a diagnosis of substance abuse problem data are not available
14A/B	The decreases in overall is due to data based on better reporting from each section.
17	The decrease in total number of consumers receiving Illness Self Management services is due to improve reporting process.
