

2021 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2021 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2021: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2021, 8,195,517 clients received SMHA services from 59 states. This is an increase from 8,013,396 SMHA clients in 2020. There were 5,789,234 adults (or 17.3 per 1,000), 2,175,848 children (or 26.9 per 1,000) served. About 9,311 (0.1 percent) clients were missing age data.
- Among SMHA clients, there were 4,342,545 (53.0 percent) females served while there were 3,806,666 (46.4 percent) males served. In 21 states and U.S. territories, more SMHA males were served than females. While in 39 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 32.9 percent, followed by ages 45-64 with 23.6 percent, children ages 0-12 with 14.8 percent, and children ages 13-17 with 12.1 percent.
- The highest percentage of SMHA clients that were served was among the White population with 58.1 percent, followed by Black or African Americans with 17.9 percent, and only 15.7 percent for Hispanics.

Guam 2021 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 population	8,195,517	22.60	24.59	59
Community Utilization per 1,000 population	7,974,393	13.90	23.93	59
State Hospital Utilization per 1,000 population	114,987	2.32	0.36	53

General Notes FY 2021

Guam

URS Table Number	General Notes
Table3	The decrease in numbers of consumers served in Community MH Programs is due to clinic operations performing client data maintenance in our GBHWC AWARDS program application. Consistency in numbers will most likely be on the following years report output. The Increase of consumers served in State Psychiatric Hospital is due to clinic operations performing client data maintenance in our GBHWC AWARDS program application. Consistency in numbers will most likely be on the following years report output.
Table4	The decrease in consumers not in labor force is due to clinic operations performing client data maintenance in our GBHWC AWARDS program application. Consistency in numbers will most likely be on the following years report output.
Table5A	Combined funding support for both people served by Medicaid and Non-Medicaid, Identified number of Medicaid (Only Medicaid)= 7, Non-Medicaid Sources (Only) = 0, All other numbers is placed in People Served by both Medicaid and Non-Medicaid
Table5B	Combined funding support for both people served by Medicaid and Non-Medicaid
Table6	The increase/decrease in numbers is due to clinic operations performing client data maintenance in our GBHWC AWARDS program application. Consistency in numbers will most likely be on the following years report output.
Table7	Due to Covid, cancellations on procurement made it difficult to account for expenditures as discuss in our video conference. No expenditure for EBP for ESMI.
Table7A	Regarding the increase in expenditures for CSC for FEP: Individuals with First Episode Psychosis continue to receive treatment and services.
Table8	Due to Covid, cancellations on procurement made it difficult to account for expenditures as discuss in our video conference to include Total MHBG Expenditures for Non-Direct Service Activities.
Table11	Staff providing survey reports informed that this year's output improved in positive outcomes is due to additional services provided to clients. More contact with consumers via programs like Project Tulaika, Project LINC added to GBHWC and Accessibility of services.
Table11A	Staff that performed the surveys did not identify Race/Ethnicity
Table12	Percent of children/adolescents meeting Federal definition of SED referenced to data provided from 2020 should have been 60% (calculation error) vs 2021 at 57%, provided updated URS 2020 file attached.
Table14A	Increase in number of American Indian/Alaska Native consumers with SMI/SED is due to clinic operations performing client data maintenance in our GBHWC AWARDS program application. Consistency in numbers will most likely be on the following years report output.
Table15	Number of consumers living in Private Residence, Jail/Correctional Facility, Homeless/Shelter is due to clinic operations performing client data maintenance in our GBHWC AWARDS program application. Consistency in numbers will most likely be on the following years report output.
Table16A	Data Not Provided
Table17	Data Not Provided
Table19A	Data Not Provided
Table19B	Data Not Provided
Table20A	Total percent readmitted within 180 days is due to clinic operations performing client data maintenance in our GBHWC AWARDS program application. Consistency in numbers will most likely be on the following years report output.
Table20B	Forensic Data Not Collected
Table21	Same as Table 20A
Table21	Increase in total percent readmitted within 30 days is due to clinic operations performing client data maintenance in our GBHWC AWARDS program application. Consistency in numbers will most likely be on the following years report output. Decrease in total percent readmitted within 180 days is due to clinic operations performing client data maintenance in our GBHWC AWARDS program application. Consistency in numbers will most likely be on the following years report output.
